

Ophthalmology Screening Report - Normal Reference Scenario

Synthetic retinal-screening narrative with no flagged referral finding.

MODEL-INPUT BOUNDARY

These report words are not eye-model features. The image model requires a 224 x 224 RGB fundus photograph.

PATIENT CONTEXT

Age: 41 years

Screening type: Routine retinal photograph review

OBSERVATION SUMMARY

Macula: documented as unremarkable in this synthetic scenario

Optic disc: documented as within expected appearance in this synthetic scenario

Retinal vessels: documented as no obvious screening flag in this synthetic scenario

TEST USE

Expected workflow: retain as document/OCR fixture only.

Eye model input remains a companion color fundus image, not this report text.
