

Ophthalmology Screening Report - Glaucoma Review Scenario

Synthetic review scenario for optic-disc and referral-path testing.

MODEL-INPUT BOUNDARY

These report words are not eye-model features. The image model requires a 224 x 224 RGB fundus photograph.

PATIENT CONTEXT

Age: 63 years

Screening type: Optic nerve / retinal photograph review

OBSERVATION SUMMARY

Optic disc: synthetic scenario describes a review-required cup-to-disc observation

Intraocular pressure: not supplied in this report fixture

Disposition: clinician review and confirmatory assessment are required

TEST USE

Expected workflow: document extraction and manual review.

Eye model input remains a companion color fundus image, not this report text.
